Subject Index of Volume 155

Alloying
  oxidation behavior of tungsten and germanium-alloyed molybdenum disilicide coatings, 199
  synthesis of molybdenum disilicide by mechanical alloying, 75
Alloys
  mechanical behavior and interface design of $MoSi_2$-based alloys and composites, 147

Brittle materials
  modeling of transformation toughening in brittle materials, 267

Carbon
  effects of carbon additions on high temperature mechanical properties of molybdenum disilicide, 159
  synthesis of a $MoSi_2$–SiC composite *in situ* using a solid state displacement reaction, 109
  ZrO_2 and ZrO_2–SiC particle reinforced $MoSi_2$ matrix composites, 259
Composites
  a comparative overview of molybdenum disilicide composites, 1
  creep of molybdenum disilicide composites, 227
  development of continuous fiber reinforced $MoSi_2$-base composites, 19
  fabrication, structure and properties of $MoSi_2$-base composites, 85
  interfacial modification in Nb/$MoSi_2$ composites and its effects on fracture toughness, 135
  mechanical behavior and interface design of $MoSi_2$-based alloys and composites, 147
  oxidation of $MoSi_2$ based composites, 183
  strengthening of discontinuously reinforced $MoSi_2$ composites at high temperatures, 121
  synthesis of a $MoSi_2$–SiC composite *in situ* using a solid state displacement reaction, 109
  tensile creep of silicide composites, 209
  vacuum plasma spraying of $MoSi_2$ and its composites, 95
  ZrO_2 and ZrO_2–SiC particle reinforced $MoSi_2$ matrix composites, 259
Creep
  creep of molybdenum disilicide composites, 227
  engineering aspect of creep deformation of molybdenum disilicide, 217
  tensile creep of silicide composites, 209

Deformation
  engineering aspect of creep deformation of molybdenum disilicide, 217
Dislocation
  dislocations, twins, grain boundaries and precipitates in $MoSi_2$, 241

Fabrication
  fabrication, structure and properties of $MoSi_2$-base composites, 85

Fibre reinforcement
  development of continuous fiber reinforced $MoSi_2$-base composites, 19
Fracture toughness
  interfacial modification in Nb/$MoSi_2$ composites and its effects on fracture toughness, 135

Germanium
  oxidation behavior of tungsten and germanium-alloyed molybdenum disilicide coatings, 199
Grain boundaries
  dislocations, twins, grain boundaries and precipitates in $MoSi_2$, 241

Interfaces
  interfacial modification in Nb/$MoSi_2$ composites and its effects on fracture toughness, 135
  mechanical behavior and interface design of $MoSi_2$-based alloys and composites, 147

Laminates
  processing and properties of Nb_5Si_3 and tough Nb_5Si_3/Nb laminates, 59

Mechanical properties
  effects of carbon additions on high temperature mechanical properties of molybdenum disilicide, 159
Microindentation
  room temperature microindentation of single crystal $MoSi_2$, 251
Molybdenum
  a comparative overview of molybdenum disilicide composites, 1
  application of ternary phase diagrams to the development of $MoSi_2$-based materials, 33
  creep of molybdenum disilicide composites, 227
  development of continuous fiber reinforced $MoSi_2$-base composites, 19
  dislocations, twins, grain boundaries and precipitates in $MoSi_2$, 241
  ductile phase toughening of molybdenum disilicide by low pressure plasma spraying, 101
  effects of carbon additions on high temperature mechanical properties of molybdenum disilicide, 159
  engineering aspect of creep deformation of molybdenum disilicide, 217
  engineering limitations of $MoSi_2$ coatings, 67
  fabrication, structure and properties of $MoSi_2$-base composites, 85
  interfacial modification in Nb/$MoSi_2$ composites and its effects on fracture toughness, 135
  mechanical behavior and interface design of $MoSi_2$-based alloys and composites, 147
  oxidation behavior of tungsten and germanium-alloyed molybdenum disilicide coatings, 199
  oxidation of $MoSi_2$ and comparison with other silicide materials, 165

oxidation of $MoSi_2$ based composites, 183
room temperature microindentation of single crystal $MoSi_2$, 251
strengthening of discontinuously reinforced $MoSi_2$ composites at high temperatures, 121
synthesis of a $MoSi_2$–SiC composite *in situ* using a solid state displacement reaction, 109
synthesis of $MoSi_2$ single crystals, 115
synthesis of molybdenum disilicide by mechanical alloying, 75
vacuum plasma spraying of $MoSi_2$ and its composites, 95
ZrO_2 and ZrO_2–SiC particle reinforced $MoSi_2$ matrix composites, 259

Niobium
interfacial modification in Nb/$MoSi_2$ composites and its effects on fracture toughness, 135
processing and properties of Nb_5Si_3 and tough Nb_5Si_3/Nb laminates, 59

Oxidation
oxidation behavior of tungsten and germanium-alloyed molybdenum disilicide coatings, 199
oxidation of $MoSi_2$ and comparison with other silicide materials, 65
oxidation of $MoSi_2$ based composites, 183
Oxygen
ZrO_2 and ZrO_2–SiC particle reinforced $MoSi_2$ matrix composites, 259

Phase diagrams
application of ternary phase diagrams to the development of $MoSi_2$-based materials, 33
Phase toughening
ductile phase toughening of molybdenum disilicide by low pressure plasma spraying, 101
Plasma spraying
ductile phase toughening of molybdenum disilicide by low pressure plasma spraying, 101
vacuum plasma spraying of $MoSi_2$ and its composites, 95
Precipitates
dislocations, twins, grain boundaries and precipitates in $MoSi_2$, 241

Silicon
a comparative overview of molybdenum disilicide composites, 1
application of ternary phase diagrams to the development of $MoSi_2$-based materials, 33
appraisal of other silicides as structural materials, 45
creep of molybdenum disilicide composites, 227
development of continuous fiber reinforced $MoSi_2$-base composites, 19
dislocations, twins, grain boundaries and precipitates in $MoSi_2$, 241
ductile phase toughening of molybdenum disilicide by low pressure plasma spraying, 101
effects of carbon additions on high temperature mechanical properties of molybdenum disilicide, 159
engineering aspect of creep deformation of molybdenum disilicide, 217
engineering limitations of $MoSi_2$ coatings, 67
fabrication, structure and properties of $MoSi_2$-base composites, 85
interfacial modification in Nb/$MoSi_2$ composites and its effects on fracture toughness, 135
mechanical behavior and interface design of $MoSi_2$-based alloys and composites, 147
oxidation behavior of tungsten and germanium-alloyed molybdenum disilicide coatings, 199
oxidation of $MoSi_2$ and comparison with other silicide materials, 165
oxidation of $MoSi_2$ based composites, 183
processing and properties of Nb_5Si_3 and tough Nb_5Si_3/Nb laminates, 59
room temperature microindentation of single crystal $MoSi_2$, 251
strengthening of discontinuously reinforced $MoSi_2$ composites at high temperatures, 121
synthesis of a $MoSi_2$–SiC composite *in situ* using a solid state displacement reaction, 109
synthesis of $MoSi_2$ single crystals, 115
synthesis of molybdenum disilicide by mechanical alloying, 75
tensile creep of silicide composites, 209
vacuum plasma spraying of $MoSi_2$ and its composites, 95
ZrO_2 and ZrO_2–SiC particle reinforced $MoSi_2$ matrix composites, 259
Single crystals
room temperature microindentation of single crystal $MoSi_2$, 251
synthesis of $MoSi_2$ single crystals, 115
Solid state displacement
synthesis of a $MoSi_2$–SiC composite *in situ* using a solid state displacement reaction, 109
Structural materials
appraisal of other silicides as structural materials, 45

Transformation toughening
modeling of transformation toughening in brittle materials, 267
Tungsten
oxidation behavior of tungsten and germanium-alloyed molybdenum disilicide coatings, 199
Twins
dislocations, twins, grain boundaries and precipitates in $MoSi_2$, 241

Zirconium
ZrO_2 and ZrO_2–SiC particle reinforced $MoSi_2$ matrix composites, 259
